

# John Meyers

## Software Engineer

### Professional Summary

Reflection on roles past tell me I'm fulfilled professionally by 2 things: people and puzzles. As a NYC Software Engineer, I've successfully bridged the gap between these 2 passions. My entrepreneurial spirit and the unique perspective I've gained through travel fuel my passion to make things work better. I'm looking to join a team and help propel a mission-driven organization to new horizons!

### Skills

- HTML, CSS, JavaScript
- SQL (PostgreSQL, NoSQL)
- React
- Node.js
- Express.js
- Ruby
- Ruby on Rails
- Git/GitHub
- RESTful APIs
